

FANTASY BEER LEAGUE

Quick Start Guide

You pick beers for different categories throughout the season. Teams blindly sample and score them. **Best beer wins.**

1 Pick Tasting Categories

Categories are important for your brewery drafting strategy, so create them first. You can get creative with them.

Examples: IPAs, Winter Spices, <5% ABV, New York Beers, Made with Chocolate

2 Draft Breweries

Hold a draft for teams to select breweries. The type of draft is up to you, but pick breweries with the categories in mind. The commissioner then assigns breweries to the teams in the app.

3 Schedule Tastings

Create a tasting for each category. You'll give each tasting a date/time and location. Good spacing is once a month or every other week.

4 Before Tasting

The commissioner locks teams for the tasting. This allows beers to be submitted and beer numbers to be assigned.

Once you know which beer you're playing, select it in the app, type a description, and submit it for the tasting. Note your beer number.

5 At Tasting

Bring your beer (discreetly labeled only with the beer number).

You'll start with beer #1 after a small amount is distributed to each team. Start/Open the session from the league dashboard to begin voting.

Taste and vote on the beer.

The commissioner will change the round when starting the next beer.

6 End of Tasting

After scoring the final beer, the commissioner ends voting to finalize and reveal the scores.

7 Win

The team with the best score at the end of season wins!
